

Hive & Colony

Hive & Colony is a growing men's clothing brand offering custom tailoring with a 3D body scanner, and a rich selection of luxury fabrics. In collaboration with Heitler Hous-toun Architects, EP Engineering has designed four locations in NYC, Paramus, NJ, Boston, MA, and King of Prussia, PA for Hive & Colony.

LOCATIONS

Various Locations in
NY, NJ, MA, and PA

CHALLENGES

- With a focus on high-quality materials in finishes in their product, Hive & Colony needs spaces with the same visual appeal. The main challenge of this MEP design was to meet Hive & Colony's aesthetic expectations, while maintaining code compli-ance as well as industry standard design practices. The MEP designs also needed to adhere to the retail landlord's strict technical criteria.

ACHIEVEMENTS

- We worked closely with Heitler Houstoun architects to ensure that MEP systems were seamlessly and imperceptibly integrated into the architecture and millwork at each location. By strategically placing access panels and consolidating equipment into back-of-house areas, we were able to create the aesthetic and Hive & Colony demands, without compromising on the function of the MEP systems.
