

Thompson Hotels Energy Audits

Thompson Hotels, known for their luxury lifestyle brand, is looking to “green” their operations. In this effort, they have hired Minimal Productions & EP Engineering to perform sustainability & energy audits in various facilities across the world. To date, reports have been created for Gild Hall in downtown Manhattan, the Thompson Beverly Hills and the famous Thompson Roosevelt Hotel in Hollywood. Thousands of dollars in energy savings have been proposed.

Challenges:

- Conducting audits in various climate zones, where each one poses unique challenges for energy saving.
- Establishing baseline energy saving measures which can be implemented across the entire portfolio of buildings.

Achievements:

Several energy saving measures were proposed with varying payback periods of less than 1-year up to 10-years. Baseline energy saving measures have been proposed including standard maintenance protocols for implementation at all hotel facilities.

Locations:

15 Gold Street
New York, NY 10038

9360 Wilshire Blvd
Beverly Hills, CA 90212

700 Hollywood Blvd,
Los Angeles, CA 90028
