

Zibetto Espresso Bar - Rock Center

Zibetto Espresso Bar has been offering a “luxury within reach” café experience to its customers since 2006, when it opened its first 6th Avenue Location. The 3rd and latest location at Rockefeller Center features high-efficiency LED lighting, state of the art espresso brewing equipment, and an environmentally conscious automatic grease interceptor system. EP Engineering was responsible for designing the Electrical, Fire Alarm, Plumbing, and Sprinkler systems for the space.

Challenges:

- Carefully coordinate power requirements for a wide range of high-end café equipment.
- Design grease interceptor system that would fit within custom cabinetry without disturbing architectural appearance.

Achievements:

- Optimized available customer space by creating a mechanical and plumbing mezzanine level above the restrooms.
- Developed custom piping layout to eliminate the need to cut the slab for the new grease interceptor system.

Location:

1221 6th Avenue
New York, NY 10020

Project Size:

1,200 SF
